

## Types of scholarships

### 1) Full CANCELLATION of tuition fees

This is a scholarship automatically granted to the best candidates. There is no separate application required. Decisions are made on the basis of an application in Dreamapply. The scholarship is awarded for the entire period of study.

In most cases, candidates are informed about such scholarships when they receive their conditional offer of admission to the university. However, if we can offer such a scholarship after June 1, we will also directly contact the suitable candidate and inform him.

### 2) Need for a study-based study allowance

Students from low-income families receive support from the state to cover the additional costs associated with obtaining higher education.

### 3) Special allowance based on the needs of need-based special allowance.

Students who are denied a need for a study benefit are eligible to apply for a special benefit based on need.

### 4) Scholarships for doctoral students

The Estonian government offers a number of scholarships designed for students, researchers or university professors to study and conduct research at Estonian public universities and institutions. Learn more about doctoral scholarships from [HERE](#).
