Summer School
at Faculty of Architecture, Cracow University of Technology
Architecture as a space experience 2019

organized and financed within the project
**EXCELLENCE PROGRAMMING – PK XXI 2.0. Cracow University of Technology
development program for the years 2018-2022**

The Faculty of Architecture of the Cracow University of Technology initiated the activity of the WA PK Summer School 2019. The main purpose of Summer School is to support the formula based on the achievements and the strategy of the Faculty of Architecture of the Cracow University of Technology, in compliance with the contribution of the individual faculties together with the practical and theoretical output of its employees. The profile of the Summer School is a response to the demand of the Polish architectural market and its expectations regarding the quality of teaching at the Faculty of Architecture of the Cracow University of Technology. The purpose of establishing Summer School is also to deepen and continue the long-standing relations of our staff with domestic and foreign academic centers and to maintain cooperation with their lecturers.

Direct effect of education at Summer School shall be regarded as the design work which ends with a presentation (an exhibition) and an accompanying certificate of course completion. Results of the education include as well deepened knowledge about the profession of an architect, knowledge gained through a contact with architectural practice, site visits, and acquaintance with the work in architectural offices.

Summer School classes are an extension of courses conducted at national and foreign faculties of architecture. The basic formula of the summer course is thinking about the problems of contemporary architecture and urban planning, as well as understanding and interpreting the matter of architecture. The workshop educational system of Summer School provides support for the program's implementation by lectures and presentations of professors from Polish and foreign academic centers, experienced architects, industry representatives, and technologists.

The theme of all editions of WA PK Summer Schools is the slogan Architecture as a space experience. This year's theme of the workshop is the Art Pavilion in the Old Town Square in Krakow. Spirit

Date: 15-24.07.2019.
Place: Faculty of Architecture of the Cracow University of Technology
